

From the author of *A Map of the World* and *The Book of Ruth* comes an entirely different kind of novel: a funny, sexy, and provocative satire about marriage.

"LAURA RIDER'S MASTERPIECE examines the complexity, joy, and disappointment of a seemingly normal life: more Jane Austen than Jodi Picoult; more *Gilmore Girls* than *Dr. Phil*. Her portrait of marriage and love exudes sympathy for each of its characters—no matter how insignificant or troubled their dreams and desires may seem. Amusing, brazen, and wise, LAURA RIDER'S MASTERPIECE cleverly shows how life can be like a fragrant peony in full bloom, ants and all."
